

# Chicago Police Department

## Annual Report 1998

**Mayor  
Richard M. Daley**

**Superintendent  
Terry G. Hillard**

# Mission Statement

The Chicago Police Department, as part of, and empowered by the community, is committed to protect the lives, property and rights of all people, to maintain order and to enforce the law impartially. We will provide quality police service in partnership with other members of the community. To fulfill our mission, we will strive to attain the highest degree of ethical behavior and professional conduct at all times.

# Superintendent's Message

**The very essence of CAPS is partnerships — between police and neighborhood residents, city agencies and businesses, churches and schools — all working together to overcome crime and neighborhood disorder.**

Chicago Police Department — Annual Report 1998

Crime in Chicago is down for the seventh year in a row—the lowest total in more than a decade. This downward trend in reported crime coincides with the implementation of our unique version of community policing—the Chicago Alternative Policing Strategy, or CAPS. While statistics help form one view of the success of our policing model, the pictures that best tell the story are those of the people working hand-in-hand to make and keep Chicago safe. So this year, in addition to the usual statistics, this report also presents a series of “snapshots” of just a few of the thousands of *real people* who are the reason our policing strategy continues to succeed.

These men and women work together with police opposing gang and drug activity, refusing to surrender to criminals. A range of new tools has proved successful in shutting down drug houses, demolishing abandoned buildings that foster crime, holding landlords accountable for illegal activity in their buildings, closing problem liquor stores and taverns, and providing safe passage for children on the way to and from school. New crime-mapping techniques are also helping police and citizens identify crime trends and anticipate problems.

Thanks to the help of other City agencies, we are making neighborhoods safer by improving lighting, trimming trees, removing abandoned cars and buildings, and erasing graffiti. By beautifying the City, we foster pride in our neighborhoods—and that makes us all less tolerant of criminal activity.

The CAPS partnership extends beyond efforts by the police, City agencies, and individuals. Collective participation by businesses, community organizations and church groups have helped form the foundation essential for grass root problem solving.

All of these efforts are making a big difference in our neighborhoods. Standing together against crime, we have put the criminals on notice that we will not hide in fear, we will not back down, and we will not accept their assaults on our quality of life.

Our work is far from over. There are still too many gangs in our communities, too many drug dealers trying to poison our children, too many guns on our streets, and too many victims in the emergency rooms and cemeteries. We continue to meet these challenges in new ways—from our groundbreaking lawsuit against gun dealers and manufacturers, to major undercover operations aimed at building federal-style conspiracy cases against drug-dealing street gangs. Our latest anti-crime program, the Distressed Neighborhoods Initiative, has already helped in several of Chicago's most troubled communities. This program is designed to reclaim specific neighborhoods, revitalize the community and maintain the community to insure that problems do not return. This gives the community a new lease on life.

We will need to work harder. More importantly, we need to continue to work together. This requires us to trust one another as true partners for a better Chicago. This, of course, is the essence of CAPS—partnerships—partnerships between police and neighborhood residents, City agencies and businesses, churches and schools—all working together to overcome crime and neighborhood disorder.

Each year more and more Chicagoans participate in a wide range CAPS programs and events. To all members of the community, I say, “We need you; join us; work with us. We can make a difference. Together we can make *your* neighborhood a safer more liveable place.”

**“The partnership between citizens and police is stronger than ever before and it’s going to get better as more and more people get involved and see the positive results we achieve when we work together.” — Superintendent Terry G. Hillard**

# Community Policing

**Fig. 1a. Beat Community Meeting Attendance**

	1997	1998	% change
Total Meetings	2,699	2,725	1.0%
Average Number of Monthly Meetings	225	227	0.9%
Total Attendees	64,221	65,620	2.2%
Average Number of Monthly Attendees	5,352	5,468	2.2%
Average Attendees Per Meeting	24	24	0.0%

**Fig. 1b. Court Advocacy Cases Tracked**

	1997	1998	% change
Total Cases	3,004	3,398	13.1%
Average Number of Monthly Cases	250	283	13.3%
Total Volunteers	5,158	4,750	-7.9%
Average Monthly Volunteers	430	396	-7.9%

The number of beat community meetings in 1998 essentially remained at their 1997 levels, while attendance increased by 2 percent. The average number of attendees per meeting remained the same. Although more Court Advocacy cases were tracked in 1998 than 1997 (13 percent), there were fewer court Advocacy volunteers involved (-8 percent).

Awareness of CAPS among Chicago residents has shown a steady increase, from 32 percent in the prototype year (when the strategy was pilot tested in five districts) to 79 percent in the fifth year of full program implementation. The increase has been consistent across demographic segments—race, gender and age. Between 65 and 87 percent of each segment related to one of these categories was aware of CAPS in 1998. In jurisdictions which have implemented a community policing strategy, it is more common to find substantial differences in awareness of the strategy across demographic segments.

**Fig. 1c. CAPS Awareness - 1993, 1996-1998**

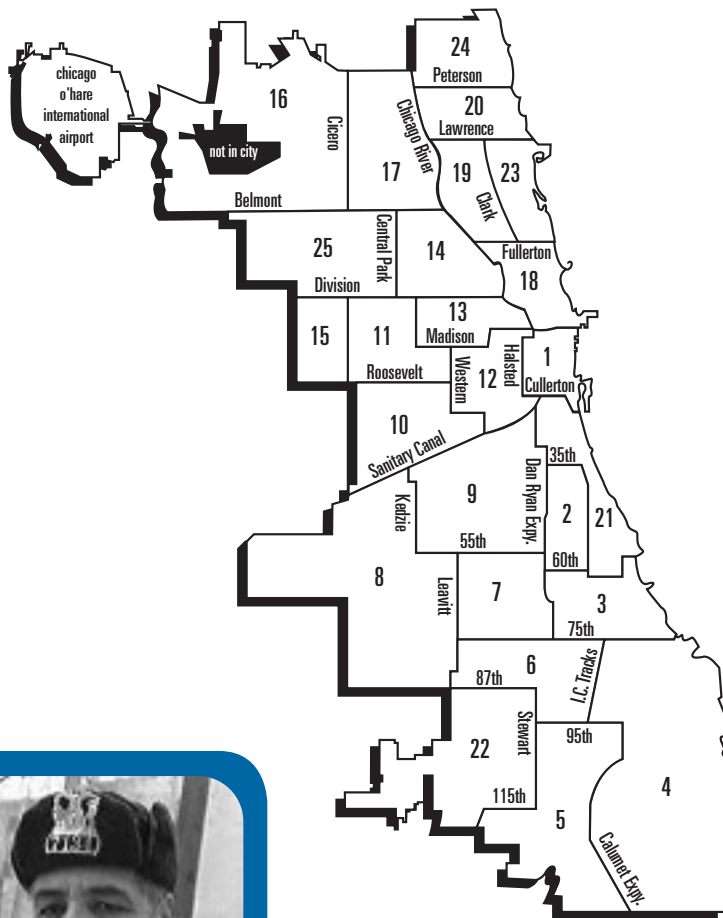

# Chicago Police Districts

Chicago is divided into 25 police districts, which are organized into five police areas. Each police district has between 9 and 15 police beats, with a total of 279 throughout the City. It is at the beat level that the Department's strategy of police-community partnership and problem solving is carried out.

Each police district is led by a district commander. In addition to uniformed beat and rapid response officers, each district has teams of plain clothes tactical and gang tactical officers. Each district also has a Neighborhood Relations Office which helps coordinate police-community partnership and problem solving at the beat level and provides special services to senior citizens.

Each of the five police areas includes detectives and youth investigators who follow up and investigate crimes occurring in their area.

\* The "Hispanic" totals in the right-most column represent a duplicate count and should not be added to the "Total" column. Hispanics may be of any race, and are already included in the racial counts.

Data compiled by Wes Skogan, Northwestern University, for the Chicago Community Policing Evaluation Consortium, based on 1990 Census figures. District populations are estimated from Census tract-level data. Due to rounding errors, district figures do not add to citywide totals.

"If we work together, we can stop gangs and violence."  
— Maria Alverado, Student

# Crime Trends

For the seventh year in a row, reported index crime declined in Chicago. The decline of 3 percent in 1998 followed a decrease of 1 percent in 1997, 3 percent in 1996, 4 percent in 1995, and 1 percent in 1994. Overall, reported index crime declined by 8.5 percent in the five years between 1994 and 1998, corresponding to a compound annual rate of 2 percent. The 253,608 index crimes reported in 1998 was the lowest total in more than a decade.

## Crime types, District trends

Six of the eight part one crime categories decreased between 1997 and 1998. These were murder, criminal sexual assault, robbery, burglary, motor vehicle theft, and arson. Arson and burglary showed relatively large decreases of 17 and 11 percent respectively, while the

remaining categories showed moderate decreases of 5 to 9 percent. The two categories which did not decrease— theft and aggravated assault/battery—were essentially stable between 1997 and 1998.

As in previous years, 1998 property crimes outnumbered violent crimes by a ratio of approximately 3:1.

Reported index crime decreased in 19 of Chicago's 25 police districts, increased in 4 districts, and remained stable in 2 others (less than 1 percent change). Among the districts that had an increase, the average increase was 4 percent. Among the districts that experienced a decrease, the average decrease was 5 percent.

## About the Uniform Crime Reports

Many of the statistics in this report reflect Uniform Crime Reporting (UCR) data for the calendar years 1997 and 1998 (January 1 through December 31). The UCR program collects information on eight different crime types that make up the Crime Index: four violent crimes (murder, criminal sexual assault, robbery, and aggravated assault/battery) and four property crimes (burglary, theft, motor vehicle theft, and arson). Murder statistics for the Department's annual report are provided by the Detective Division, Crime

Analysis Unit. All other statistics come from the Illinois Uniform Crime Reporting "Monthly Summary Report" generated by the Data Systems Division.

UCR data are limited in that they measure only those crimes that are reported to the police. Nationally, it is estimated that one-third to more than one-half of the crimes that actually occur never get reported. Annual changes in the UCR may therefore reflect a real change in the incidence of crime, a change in victims' reporting behavior, or a combination of the two.

**Property Crimes**

**Burglary.** The unlawful entry of a structure to commit a felony or theft, or an attempt to do so.

**Theft.** The unlawful taking or attempted taking of prop-

erty or articles without the use of force, violence, or fraud.

**Motor vehicle theft.** The unlawful taking of or attempt to take a motor vehicle.

**Arson.** The willful or malicious burning or attempt to burn a house or other building, motor vehicle, aircraft, or personal property of another.

**Violent Crimes**

**Murder.** The willful killing of a person, or the death through negligence of another.

**Criminal sexual assault.** Broader than the traditional definition of “rape” (the carnal knowledge of a female, forcibly and against her will), this category includes any sexual assault—completed or attempted, aggravated or non-aggravated—committed against any victim, female or male.

**Robbery.** The taking of or attempting to take anything of value from the care or custody of a person, by force or threat of force.

**Aggravated assault/battery.** The intentional causing of serious bodily harm or attempt to cause serious bodily harm, or threat of serious bodily injury or death. This category includes aggravated assault, aggravated battery, and attempted murder.

“I can say, ‘I did this.’ I wanted to help. I wanted to come in and try to make a change. This is my community and I wanted to leave this for my children.”  
— Belinda Henderson, CAPS Community Partner

\* **Note:** The 1998 Annual Report is the first edition to provide index crime by community area. The community area figures were produced based on police district index crime totals. However, it was not possible to attribute all the index crimes to a specific community area. As a result, the reader will note that the total shown by community area is less than the total shown by police district. To help the reader identify community areas, a map is available on page 16 of this report

*"I attended several of the schools in the area when I was growing up and I can assure you we didn't have this kind of community effort to ensure our safety." — Phillip Jackson, Chicago Housing Authority CEO*

*"By having strong community organizations, we were really able to build on those attributes in the community and make this community work together." — Sergeant Lucius Moore*

**Fig. 6a. Violent vs. Property Crimes**

Violent index crimes are those committed directly against a person, while property index crimes are those in which there is no direct threat or harm to a person.

Violent crimes accounted for 25 percent of all 1998 index crimes reported in Chicago. This percent has remained fairly stable over time.

In 1998, aggravated assault/battery and robbery accounted for 95 percent of violent crimes. Murder accounted for just over 1 percent. Among property crimes, theft was the leading offense, with 64 percent of reported property incidents. In fact, theft accounted for 48 percent of all index crimes reported in 1998.

**Fig. 6b. Violent Crimes**

**Fig. 6c. Property Crimes**

*“One of the reasons CAPS is so successful is that it’s so simple.”*  
 — John Kirchoff, CAPS Community Partner

After generally increasing from 1989 through 1991, total violent crime declined steadily from 1992 through 1998, at a compound annual rate of 5 percent. The 62,947 violent crimes reported in 1998 represent a decline of 30 percent from the 10-year peak—in 1991—of 90,522 offenses.

Individual crime categories varied in their percent and pattern of decrease. Between 1992 and 1998, robbery declined by 40 percent; criminal sexual assault, by 36 percent; murder, by 25 percent; and aggravated assault, by 11 percent. Robbery and criminal sexual assault showed a steady decline between 1992 and 1998. For murder and aggravated assault/battery, the decline was interrupted by an increase in 1994. Murder did not begin to decline until 1993, a year after the other crime categories.

<b>Total</b>	<b>759</b>	<b>703</b>

Murders decreased by 7 percent between 1997 and 1998, and the 703 murders committed in 1998 are a 10-year low.

Of the 1998 murders whose cause could be determined, 36 percent were gang-related. Other relatively frequent causes were altercations (19 percent), and domestic incidents/child abuse and robbery/burglary (each 12 percent). These four causes accounted for 79 percent of the 1998 murders whose cause was known.

Almost half of the known offenders (47 percent) in 1998, were under 21 years of age, and about a third (35 percent) were 21-30. Persons over 30 represented 1 in 6 murder offenders. The age distribution in 1997 was similar.

On average, murder victims were older than murder offenders. Whereas the average age of victims was 29 years, the average age of offenders was 24 years. And while persons over 30 were less than 18 percent of the offender population, they accounted for 30 percent of the victim population.

In almost two out of every three 1998 murders in which the relationship could be determined, the offender and the victim knew each other. When they did know each other, it was generally not in a close relationship. Murders in which a romantic partner, spouse, or other family member was the victim accounted for only 25 percent of the murders where the parties knew each other.

**"We had problems in some buildings, but people came together, started problem solving, and the problems went away."**  
— Rosia Anderson, CAPS Community Partner

Property index crimes followed a similar pattern to violent index crimes between 1989 and 1998: a general increase between 1989 and 1991, followed by a steady decline from 1992 through 1998. The 190,661 property crimes reported in 1998 represent a decline of 18 percent from the 1991 peak of 233,387 offenses. This decrease is 12 percentage points less than the decrease in violent index crimes over the same period.

As was true of violent crimes, individual crime categories varied in their percent decrease; and one category showed an increase.

Between 1992 and 1998, reports of motor vehicle theft were down by 29 percent; burglary, 27 percent; and arson, 17 percent. Theft was the category that increased, but by a modest 1 percent. Motor vehicle theft, having declined for eight consecutive years, reached a 10-year low in 1998.

**Fig. 9a. Arson**

**Fig. 9b. Burglary**

**Fig. 9c. Theft**

**Fig. 10d. Motor Vehicle Theft**

*“When we get together with the community, it’s really great. We have a rallying point, we talk, and we gain new strength and energy to go out there and fight crime together.” — Sergeant Crystal King-Smith*

# Motor Vehicle Theft

**Fig. 10a. Motor Vehicle Thefts\***

	<b>1997</b>	<b>1998</b>	<b>% chg</b>
Actual thefts	29,991	29,400	-2.0%
Attempted thefts	2,463	1,925	-21.8%

**\*Note:** The total motor vehicle theft figures noted above differ from those figures reported as part of the index crime totals (pages 10 and 11). The index crime totals reflect all reported motor vehicle thefts at year end. The figures above reflect subsequent analysis, as of May 1999, which showed that many cases originally reported as motor vehicle theft, were in fact towed vehicles or other non-motor vehicle theft incidents.

**Fig. 10b. Recovered Stolen Motor Vehicles**

	<b>1997</b>	<b>1998</b>	<b>% chg</b>
Total Stolen Motor Vehicles Recovered	35,168	31,342	-10.9%
Recovered in Chicago	32,419	28,453	-12.2%
Recovered outside Chicago	2,749	2,889	5.1%
Vehicles Stolen Outside Chicago and Recovered Within the City	4,438	4,521	1.9%

The number of vehicles stolen in Chicago decreased by 2 percent between 1997 and 1998, while the number of attempted thefts fell by 22 percent.

The number of motor vehicle thefts indicated here is some 2,400 fewer than the number recorded as index crimes. Whereas index crimes are based on reported offenses, the

present count is based on founded offenses. In many cases, vehicles reported as stolen are discovered to have been towed, or to have been involved in another non-theft incident.

The number of recovered stolen vehicles decreased by 11 percent between 1997 and 1998. Although this is a sharper decrease than the decrease in stolen vehicles, there were still more vehicles recovered than stolen in 1998. This suggests that some thefts may not have been reported, or may have occurred in earlier years, or that some recovered vehicles had been stolen outside of Chicago.

In motor vehicle thefts, clearance rates tend to be low (see Figure 14a and 14b on pages 24 and 25 respectively). Stolen vehicles may be quickly stripped and abandoned, or loaded onto ships for foreign destinations. In either case, there may be little indication of the offender.

**"I think if we continue to build upon some of the relationships the community and police have developed, we can continue to improve and keep the momentum going." — Norman Altman, District Advisory Council Chair**

# Hate Crimes

Hate crimes are those committed for reasons of race, religion, ancestry, gender, sexual orientation, disability, or national origin. The 204 reported incidents in 1998 represent a decrease of 4 percent from the 212 reported incidents in 1997, and of 6 percent from the average of the previous 10 years, which was 216. The decrease between 1997 and 1998 was driven by a decline in hate crimes based on religion. These dropped by 30 percent, and represented two-thirds of the decrease between 1997 and 1998.

In 1998, as in previous years, the most common motive for hate crime was racial bias—against both minority and non-minority victims. Racially-motivated hate crimes accounted for 62 percent of the total in both 1997 and 1998. The most common reported hate crimes in 1998 were assault (46 incidents), battery (32 incidents), and criminal damage to property (32

incidents.) These crimes constituted 59 percent of the reported total. The same three categories led in 1997, accounting for 62 percent of the reported total.

Hate crime offenders—when their demographic characteristics were known—tended to be white males (56 percent) or black males (34 percent). These were also the predominant groups in 1997, but with the percentages reversed: black males, 51 percent; white males, 35 percent.

For more detailed information on hate crimes, see the Department's report, [Hate Crimes in Chicago: 1998](#).

**Fig. 11a. Reported Hate Crimes**

"We're really beyond the basics now and moving to that next level where people are really improving the quality of life and taking on the problems."  
— Ted O'Keefe, CAPS Project Manager

# Firearms

**Fig. 12a. Firearms Recoveries**

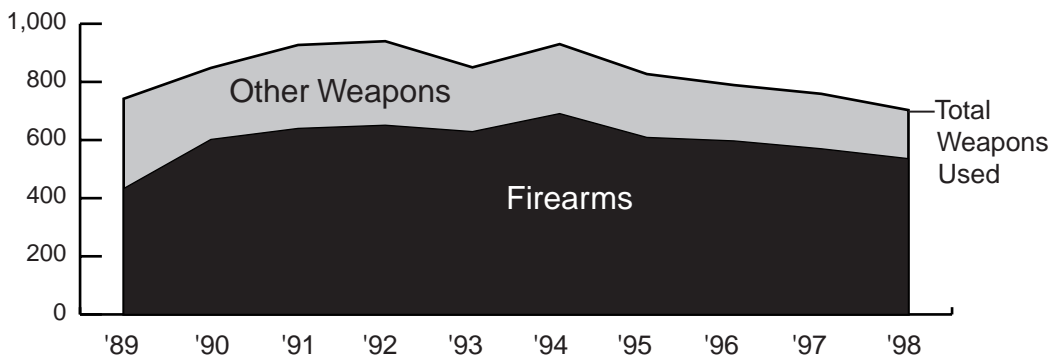

\* Includes 1,104 firearms which were recovered in the “Goods for Guns” program

For the fourth year in a row, the number of firearms recovered by Chicago police officers declined in 1998. The 11,522 firearms seized by police last year was 6 percent lower than the 1997 figure of 12,257. The continued decline in firearm recoveries may indicate that fewer illegal guns are being carried on the City’s streets. Gun recoveries began a sharp decline in January, 1995—the effective date of a state law that makes unlawful use of a weapon (UW) a felony on first offense.

The percentage of murders in which firearms were used was 76 percent in 1998, about the same percent as in the previous four years. Some 83 percent of firearms murders were handgun murders, close to the 85 percent in each of the previous three years. Apart from firearms, cutting instruments accounted for 9 percent of 1998 homicides; other objects and substances, 8 percent; and the offender’s own body—hands, feet, or fists—7 percent.

**Fig. 12b. Murder Offenses by Weapon Type**

“Going door-to-door is the only way to do it . . . get them out . . . get people involved and let them know someone cares.”  
— Marie Lack, CAPS Community Partner

# Arrest Data

Index crime arrests decreased by 13 percent between 1997 and 1998, as index crimes themselves decreased by 3 percent. Twenty-three percent of index crimes were cleared in 1998, the same percent as in 1997. On average, violent crimes were more than twice as likely to be cleared as property crimes—39 percent vs. 18 percent.

"I think people know what CAPS is now and what we need to do is get more people involved in problem solving."  
 — Irma Perres, Community Organizer

# Traffic Safety

The number of traffic crashes declined by 2 percent between 1997 and 1998. Fatal crashes, however, rose by 3 percent. Injuries resulting from crashes declined by 12 percent in the case of vehicle occupants, and 5 percent in the case of pedestrians. However, fatalities increased for both occupants and pedestrians: by 3 percent and 4 percent, respectively.

Crashes are caused by a multitude of factors. Failure to yield was the most frequent cause in 1988, accounting for 23 percent of serious (non-Type A) crashes. Each other cause was below 10 percent of the total, ranging from following too closely (10 percent) down to license restrictions (0.07 percent). The largest increase, in percentage terms, was in crashes caused by improper parking (13 percent). The largest decrease was

in driving too fast for conditions (-7 percent).

The most common types of fatal crash in 1998 were a vehicle striking a pedestrian (38 percent of fatal crashes) and a vehicle striking another vehicle in traffic (32 percent).

Roadside safety checks are one method used by the Police Department to enforce drunk driving and other traffic safety laws. The Department selects a site for a check based on factors such as past DUI arrest activity, the proximity of alcohol-related businesses, and public safety considerations. Officers slow the traffic flow and stop cars at regular intervals, speaking with drivers and watching for signs of alcohol use and other violations.

Saturation patrols are similar in purpose to roadside safety checks, but involve roving patrols. Additional police vehicles are assigned to an area identified as a high accident location. Targeted offenses include speeding, unsafe vehicles, DUI and open alcoholic beverages, improper safety belt usage, and violations involving insurance, driver's licenses, license plates, and City stickers.

**"We got everyone involved—families, schools, and police—with a common cause—getting our children to school safely."**  
 — Frances Oden, Chicago Public School Principal

# Youth Investigations Group Activity

Investigations by the Youth Investigations Group decreased by 2 percent between 1997 and 1998. This decrease was driven by a 3 percent decline in missing persons investigations. Children and family-related investigations increased by 2 percent overall, with a substantial increase in child abuse (20 percent) and child abduction (18 percent) investigations.

Two enforcement activities increased, and three decreased, between 1997 and 1998. The two that increased were Juvenile Court subpoenas serviced (7 percent) and weapons recovered (5 percent). The three that decreased were Juvenile Court warrant arrests (-15 percent), Part I Index Crime arrests (-5 percent) and Non-Index Crime arrests, Part II (-11 percent).

The number of juveniles processed by

the Department declined by 7 percent between 1997 and 1998—from 342,471 to 317,259. School absenteeism was the leading disposition in both years, accounting for 38 percent of the total in 1998. Despite the overall decrease, the number of juveniles directed to Criminal Court increased by 43 percent, from 224 to 303 individuals. With the exception of school absenteeism (-3 percent) and curfew arrests (-1 percent), decreases among specific disposition categories were in the double-digit range, from -11 to -19 percent.

**Fig. 17a. Youth Investigations**

	1997	1998
Missing Persons	25,675	24,908
DCFS Hotlines	2,224	2,011

Curfew Arrests (total)	65,071	64,446
Community Adjustments*	36,923	30,950
Referred to Agencies	26,880	22,762
Referred to Family	10,043	8,188
Directed to Juvenile Court	16,964	14,859
Directed to Criminal Court	303	433
Status Offenders**	1,013	835

**Note:** Youths are defined as persons under 17 years of age.

\* When a youth is taken into custody for a crime, he or she is turned over to a youth investigator, who determines whether the youth will be directed to court or released to a parent or guardian with a community adjustment. Community adjustments provide for follow-up assistance or counseling by a youth investigator or community agency

\*\* Status offenses are those which, if committed by an adult, would not be crimes. These include running away, truancy, and possession of cigarettes or alcohol.

*"Each year it becomes more evident that our successes are a direct result of the strengths each stakeholder—whether community member, City agency or police—contributes to the partnership." — Assistant Deputy Superintendent Barbara McDonald*

# Calls for Service

**Fig. 18b. Incoming Calls Received**

	1997	1998	% chg
9-1-1	3,516,610	3,770,795	7.2%
Non-Emergency – MOII	47,297	50,372	6.5%
Non-Emergency – 746-6000	657,921	691,395	5.1%
Other Calls	377,445	387,541	1.0%
<b>Total</b>	<b>4,599,273</b>	<b>4,900,103</b>	<b>9.3%</b>

**Fig. 18c. Other Communications**

	1997	1998	% chg
Patrol Dispatches	2,353,225	2,345,307	-0.3%
Alternate Response Section (ARS) calls	537,439	609,387	13.4%
ARP Dispatches	157,460	161,502	2.6%
ARP RD numbers (case reports)	152,573	157,338	3.1%
Foreign Language Line calls received	31,124	36,187	16.3%
Total burglar alarm dispatches	200,205	236,667	18.2%
False alarm percentage	98.4%	98.9%	

Calls to 911 increased between 1989 and 1993, dipped in 1994 and 1995, and resumed their upward climb in 1996 through 1998. The 1998 total was 7 percent over 1997. Calls to the Department's non-emergency number increased by 5 percent in 1998. In Fig. 19c, "other calls" include administrative calls from the field to the 911 Center, and automatic calls from triggered burglar alarms to the center. These increased by 3 percent between 1997 and 1998.

Patrol dispatches essentially remained at their 1997 level. Alternate Response Program calls—to the Department's non-emergency number—increased by 13 percent. Foreign language calls received increased by 16 percent over 1997. Burglar alarm dispatches increased by 18 percent, but almost all (99 percent) proved to be false alarms.

**Fig. 18a. 9-1-1 Calls for Service**

*"Our community is really coming together. We attend beat meetings, try to get to know CAPS personnel and have talked to the Commander about problems and issues in our area." — Kevin Sutton, District Advisory Council Member*

# Education and Training

The Education and Training Division trained 13 recruit classes in 1998, graduating 821 recruits for the Chicago Police Department. The number of recruits is an increase of 46 percent from the 563 recruits graduated in 1997. Recruits receive 736 hours of training and instruction in the Academy, followed by a 10-week field training program. Recruits are on probation until they reach their one-year service anniversary. In addition to Chicago Police Department recruits, the Education and Training Division trained 169 recruits for suburban police agencies—an increase of 29 percent from the 131 in 1997.

Each year, all sworn personnel are required to pass a State of Illinois Course of Fire with their duty weapon and optional duty weapon, if applica-

ble. Firearms training and qualification are conducted at each of the five area headquarters firing ranges and at the Training Academy.

**Fig. 19. Education and Training**

<b>Types of Training</b>	<b>Number of Trainees</b>
Total Recruits	990
Chicago	821
Suburban	169

<b>Total</b>	<b>26,335</b>

*“Somebody who has been made aware of a gang situation [at a beat meeting] has a better handle on how to deal with it . . . if you don’t know what’s going on, then you’re going to be in trouble.” — Freddie Calix, CAPS Community Partner*

# Budget

**Fig. 20. Annual Appropriations**

	<b>1997</b>	<b>1998</b>
Personnel Services (salaries, wages etc.) <sup>(a)</sup>	\$863,369,817	\$860,867,280
Contractual Services <sup>(b)</sup>	\$18,322,950	\$13,822,474
Travel	\$176,842	\$52,422
Commodities <sup>(c)</sup>	\$8,460,424	\$7,781,231
Equipment (excluding capital equipment)	\$408,211	\$273,775
Improvements (buildings)	\$50,000	\$25,000
Contingencies	\$52,500	\$45,000
Employee Medical <sup>(d)</sup>	\$5,550,000	\$5,550,000
Physical Exams for Recruits and Promotions	\$1,420,145	\$1,435,145
Capital Equipment Note	\$14,490,801	\$4,170,000
<b>Total</b>	<b>\$912,301,690</b>	<b>\$894,022,327</b>

(a) Includes Corporate, Midway and O'Hare funds

(b) Rental and repairs of equipment; professional and technical services; utilities; etc.

(c) Repair parts, material supplies, etc.

(d) Cost and administration of hospital and medical expenses for employees injured on duty who are not covered under worker's compensation.

The Police Department's 1998 appropriation totaled some \$894 million—a 2 percent decrease from the 1997 figure.

Although personnel costs declined by 3 percent in absolute terms, they increased as a percent of total appropriations, from 95 percent in 1997 to 96 percent in 1998. These costs include salaries, wages, and benefits for sworn and civilian employees.

All other appropriation categories decreased in absolute dollar amounts between 1997 and 1998, with the exception of physical exams for recruits and promotions. This item increased by 6 percent; it is recalled that the number of recruits increased by 46 percent in 1998.

# Personnel

The Chicago Police Department had 16,561 members at the end of 1998, virtually the same number as in 1997. There was, however, a 6 percent decline in civilian employees. At the end of 1998, 30 percent of all Department members were women, and 44 percent were classified as minorities—Black, Hispanic, Asian, or Native American. These are approximately the same percentages as in 1997.

**Fig. 21a. Salary Schedule - Sworn Members**

Title	Salary	
	Starting	Maximum
Superintendent		\$130,812
First Deputy Superintendent		\$123,612
Deputy Superintendent		\$117,372
Chief	\$87,078	\$115,896
Assistant Deputy Superintendent, Deputy Chief, Executive Assistant	\$79,920	\$106,356
Commander, Director, Administrative Assistant, Administrator, Coordinator	\$77,232	\$101,724
Captain, Watch Commander	\$57,492	\$82,854
Lieutenant	\$52,212	\$76,992
Sergeant	\$46,152	\$68,880
Detective, Youth Officer, Patrol Specialist	\$39,954	\$60,846
Police Officer	\$33,522	\$57,888

<b>Total</b>	<b>9,325</b>	<b>5,225</b>	<b>208</b>	<b>32</b>	<b>1,771</b>

“Right across the street was a drug house. It took a little time, but working together with the community and police, we were able to dry that house up and move them on.” — Robert Washington, CAPS Community Partner

# Fleet Inventory

**Fig. 22. Fleet Inventory**

	<b>1997</b>	<b>1998</b>
Marked	1,675	1,833
Unmarked	1,315	1,348
Coverts	272	263
Motorcycles, all-purpose vehicles	169	123
Squadrols	100	98
Prisoner minivans	32	26
Vans, R-trucks, parts trucks	27	26
Suburbans and Blazers	24	24
Utility vehicles	24	23
Trailers	23	20
Station wagons	31	19
Canine vans	15	15
Prisoner vans	15	14
Generators	8	8
Boats	5	5
<b>Total</b>	<b>3,735</b>	<b>3,845</b>

The Department's fleet included 3,845 vehicles in 1998, an increase of 3 percent over 1997. The most common vehicles in 1998 were marked squad cars (48 percent of the fleet) and unmarked squad cars (35 percent). While the number of marked squad cars represented a significant increase over 1997 (9 percent), the number of unmarked squad cars represented a more modest increase (3 percent). In percent-age terms, the largest 1998 decrease was in motorcycles/all-purpose vehicles (27 percent).

*“Community policing in Chicago is unique. It’s not just a program—it’s the way we police. It’s the police, other City agencies, and the public coming together and forming a partnership to address chronic crime and disorder in the community.”*

— Assistant Deputy Superintendent Janet Peska

# Allegations of Misconduct

Allegations of misconduct by Department members are investigated by the Internal Affairs Division (IAD), or, in the case of complaints alleging excessive force or off-duty domestic or neighborhood disputes, by the Office of Professional Standards (OPS). A Complaint Register (CR) number is issued whenever a complaint is received. Each complaint is investigated, and a determination is made as to whether there is sufficient evidence to sustain the allegation and take disciplinary action.

**Fig. 23a. Internal Affairs**

Allegations	Investigation	Sustained
	Initiated	Finding*
Operation/Personnel Violations	2,221	555
Civil Rights Violations	754	11
Traffic (non-bribery/excessive force)	498	106
Verbal Abuse	651	20
Conduct Unbecoming (off-duty)	732	223
Arrest/Lock-up Procedures	374	86
Commission of a Crime	459	47
Civil Suits	1	0
Alcohol Abuse	24	11
Drug/Substance Abuse	24	24
Bribery/Official Corruption	39	3
Supervisory Responsibilities	1	0
<b>Total</b>	<b>5,778</b>	<b>1,086</b>

\* Some investigations classified as “sustained” reflect cases initiated in a prior year.

**Fig. 23b. Recommended Disciplinary Actions in Sustained Cases — IAD and OPS\***

	1997	1998
Reprimand	503	461
Suspended 1 to 5 days	917	848
Suspended 6 to 15 days	160	125
Suspended 16 to 30 days	103	61
Suspended over 30 days	9	4
Separated from the Department	68	50
<b>Total</b>	<b>1,760</b>	<b>1,549</b>
Violation noted, no action	154	196
Summary Punishment Action Request	—	4,466
Hold - Penalty Not Served	—	119
Resigned while under investigation	220	149

\* Includes disciplinary actions on cases from prior years.

“A lot of the residents are banding together. CAPS has given us a vehicle to get to know one another.” — Margaret Wojcicki, Beat Facilitator

**Fig. 23c. Excessive Force Complaints  
(Office of Professional Standards)**

	<b>1997</b>	<b>1998</b>
Complaints retained by OPS	3,115	2,857
Complaint Registers completed	3,108	2,799
Unfounded <sup>(a)</sup>	508	703
Exonerated <sup>(b)</sup>	46	60
Not sustained <sup>(c)</sup>	2,254	1,833
Sustained <sup>(d)</sup>	300	203

**Note:** Some cases are carried over from CR numbers issued in prior years.

(a) Unfounded: The complaint was not based on facts as shown by the investigation, or the reported incident did not occur.

(b) Exonerated: The incident occurred, but the action taken by the officer(s) was deemed lawful, reasonable and proper.”

(c) Not sustained: The allegation is supported by insufficient evidence which could not be used to prove or disprove the allegation.

(d) Sustained: The allegation was supported by sufficient evidence to justify disciplinary action.

“ People once had an attitude that, ‘there is nothing I can do,’ but they are seeing that through CAPS, they can get involved and and they can make a difference.’ ”  
— Rev. Spencer Jones, CAPS Community Partner
